Professional Summary

I am a Computer Engineering student with a strong interest in building reliable and well-designed software. I have hands-on experience with C, Java, and Python, and I enjoy working on system-level projects, backend development, and scalable web applications. I am particularly interested in quality engineering and test automation because I like thinking about how software can fail, finding edge cases, and making sure systems work as expected. Alongside my technical work, I currently serve as Vice President at EESTEC LC Bucharest, where I coordinate corporate partnerships and help organize large technical events. I am eager to grow as a QA Automation Engineer and contribute to building software that is both robust and user-friendly.

Technical Skills

- **Languages:** C, C++, Java, Python, JavaScript, Verilog, Racket, Haskell, Prolog, SQL (basic)
- **Technologies & Tools:** React.js, Node.js, Git, Firebase, Stripe, Makefiles, REST-API, CI/CD, Pipelines
- **Security & Networking:** TCP/IP, protocol design, firewalls, CTF challenges, basic identity and access concepts
- **Databases:** Firebase (NoSQL), basic SQL querying
- **Operating Systems:** Linux, Windows

Education

Politehnica University of Bucharest – Faculty of Automatic Control and Computer Science
BSc in Computer Engineering and Information Technology - Expected June 2027
GPA: 9.05

- | | |
|--------------------------------------|---------------------------------------|
| • Programming Fundamentals (C) | • Data Structures & Algorithms |
| • Object-Oriented Programming (Java) | • Algorithm Design & Analysis |
| • Python Development | • Operating Systems |
| • Programming Paradigms | • Communication Protocols |
| • Hardware Programming | • Computer Architecture |
| • Modern Processor Architecture | • Parallel and Distributed Algorithms |

Experience

Programming Instructor – Logiscool (Sept 2025 – Present)

- Teach programming and core computer science concepts to students aged 8–18, adapting content to different learning levels.
- Deliver practical lessons in Python, introductory AI concepts, Scratch, and hybrid Scratch–Python modules.
- Focus on problem-solving, logical thinking, and building confidence with technology through hands-on exercises.

Projects

BizGenie – UiPath Hackathon Project

- Developed an intelligent automation solution using agent orchestration to streamline complex business workflows.
- Designed a system where autonomous agents collaborate to analyze data and execute multi-step tasks efficiently.

Asynchronous Web Server (C)

- Designed and implemented an asynchronous web server in C using epoll and non-blocking I/O.
- Achieved support for 10,000+ concurrent connections using an event-driven architecture.

Parallel Firewall (C)

- Implemented a multithreaded firewall in C for high-throughput packet analysis.
- Designed rule-based filtering to balance performance and network protection.

Mini UNIX Shell (C)

- Built a custom UNIX-like shell supporting job control, piping, redirection, and command history.
- Implemented over 20 built-in commands to improve usability and scripting capabilities.

Topic-Based Publish/Subscribe Server (C)

- Designed a scalable server using UDP for message ingestion and TCP for delivering filtered content to clients.
- Implemented topic-based subscriptions with wildcard support ("+" and "**") and persistent reconnection handling.
- Defined a custom binary protocol and managed socket multiplexing with epoll for high concurrency.

Personal Portfolio Platforms (React.js)

- Built two fully functional personal websites with modern UI, Firebase auth, and REST API integration.
- Optimized for performance (code-splitting, lazy loading); 1,000+ monthly visitors and 99.9% uptime.

Leadership

Vice President – Corporate Relations, EESTEC LC Bucharest (2025–Present)

- Coordinate corporate partnerships with technology companies and manage long-term collaborations.
- Lead and mentor a growing team, handling planning, communication, and delivery of partnership objectives.

Organizer – EESTEC Olympics 13 (Hackathon) (2025)

- Part of the core organizing team for a large-scale university hackathon.
- Responsible for partner coordination, sponsorship deliverables, and technical event logistics.

Additional Technical Activities

Corporate Relations Lead – D.E.B.U.G. International Cybersecurity Workshop (2025)

- Coordinated industry sponsorship and supported CTF-focused training sessions for international participants.

Participant – Quantum Hackathon (2025)

- Worked in a multidisciplinary team on a quantum-inspired prototype while gaining exposure to Qiskit and quantum algorithms.

Certifications & Courses

- **CS50: Introduction to Computer Science** (Harvard via edX, self-taught, not certified)
